

the application, and to inspect the buildings and equipment of the college in connection with it, have reported to Senate, and that Senate has adopted the conclusions of the report, which are in the following terms :—

“The committee are of opinion that there is ample opportunity for the development of University teaching in Sunderland, and a prospect of it actually taking place in a near future, and that the technical college is well adapted to serve as a nucleus. At present, however, the college is not in a position to undertake the curriculum the University requires in pure science, as it offers no teaching in geology, zoology, or botany. The Committee is of opinion that the college would be competent to undertake the University curriculum in engineering and electrical engineering if the following extension of its present resources could be provided :—

“A more extensive physical laboratory, more fully provided for the teaching of branches of physics other than electricity.

“A separate lecturer at the head of the department of electrical engineering, who should by preference be a practising electrical engineer.

“An extension of the laboratory accommodation and appliances for teaching electrical engineering.

“A more adequate engineering laboratory, provided with the necessary steam machinery.”

I am further desired to inform you that it will give Senate sincere pleasure to hear further from you upon the matter, should you see your way to extend the resources of the college to meet the requirements which the University regards as essential for University teaching in engineering and electrical engineering ; or further so to extend the scope of the education carried on in your college as to cover the University curriculum in pure science, or in any of the other branches of applied science recognised by the University as qualifying for degrees.

Faithfully yours,

(Signed) W. K. HILTON,
(Registrar).
